## *When you can't count on the weather Count on DuPont*

*Thousands of acres of wheat and barley are destroyed by the weather each year. While none of us can change the way nature behaves, DuPont would like to change the way we deal with its aftermath.*

Crop Protection Plus<sup>SM</sup> is a product replacement program from DuPont for wheat and barley growers in the western United States<sup>1</sup> who apply DuPont™ Affinity™\*, Ally®, Express®, Finesse®, Glean® or Harmony® brand herbicides during the fall 2005 or spring 2006 season. Under Crop Protection Plus<sup>SM</sup>, DuPont will provide eligible growers with product replacement credit when a field or a majority of a field treated with a DuPont herbicide for wheat has been so affected by drought, flood, hail, frost/freeze or fire that it is uneconomical to harvest†. Should this occur, DuPont will provide credit through the local retailer where purchased for enough replacement herbicide to treat an area equivalent to the lost area the following season.
